Pancreatic Digest of Soya

RDM-P-12

Principle: Pancreatic digest of soya is soyabean origin protein and extracted from soyabean meal. It is a rich source of amino acids, nitrogen, carbohydrates and contain adequate amount of vitamins and minerals to stimulate the growth of microorganisms. Due to high concentration of carbohydrate its commonly used in media for cultivation of large variety of organisms, including fungi and yeast.

Use: Recommended to use as culture media ingredient in variety of media and in fermentation.
