

Sabouraud Dextrose Broth (Harmonized)

RDM-H-SDB-01

Principle

Sabouraud dextrose broth is used for cultivation of yeasts, molds and aciduric bacteria. It is recommended by USP as a medium for microbial limit testing of pharmaceutical products and raw material used in pharmaceutical industries. The medium is prepared in accordance with the harmonized principles of USP. Medium is consisting of meat and casein peptone (1:1) and dextrose monohydrate. The meat and casein peptone provide carbonaceous, nitrogenous compounds, long chain amino acids, vitamins and other essential growth nutrients in addition to that the dextrose monohydrate serves as energy source. The high concentration of dextrose and low pH of medium favor the growth of yeasts and molds and inhibit other contaminating bacteria from pharmaceutical and clinical specimens.

Use: Recommended for the cultivation of yeasts, molds and aciduric bacteria from pharmaceutical products in accordance with the microbial limit testing by harmonized principles of USP.
